Freezer gifted to Science Department

The Math & Science Division of Independence Community College received a gift of a freezer this week. The unlikely offering was granted after a need was expressed within earshot of ICC's new Foundation Director Lori Shaw.

"We all understand what it's like when the needs exceed the budget," said Shaw. "When I heard there was a need for a freezer, it just seemed like a cause the Foundation could help them with. I went back to our officers and they were really delighted to work with the department."

"The Math & Science Division would like to thank Lori Shaw and the ICC Foundation for helping to raise funds toward the purchase of a new chest freezer for the Division," said Brian Foreman, Division chair and Associate Professor of Biological Science. "The freezer will allow us to store materials used in cold temperature experiments and increase our storage and holdings of preserved biological materials used in chemistry and biology classes."

"I know a freezer seems like such a mundane thing to add to our department," continued Foreman when asked about the need, "but it will make a big difference in many of the things we can do."
